SLIDE PROTECTION BARRIER

The slide protection barrier offers **added protection to your access road** by forming a barrier to prevent small and large vehicles from veering off the roadway. It's **quick and easy to install** and connects to the existing connecting points on the panels. Due to the design it still allows 3000mm width of clearance on the panels.

Comprised of separate components: base plate, pipe and end caps the slide protection barrier can be connected together to create different lengths and configurations. Light components that can be handled by one person and no plant is required for install.

Structurally designed tube and base plate sections for maximum strength and durability. The barrier can withstand vehicles of up to 40tonnes by preventing them from veering off the roadway in unforeseeable circumstances.

KEY BENEFITS

QUICK AND EASY
ASSEMBLY

CONNECTS TO
EXISTING ROADWAY

HIGH
VISIBILITY

NO GROUND
PENETRATION

ADDED GROUND
PROTECTION
